

WORBLI – WORLD BLOCKCHAIN INITIATIVE

“Short Paper”

v 1.4

BLOCKCHAIN TECHNOLOGY HAS TOO MANY BUZZWORDS

Confusing jargon and technology has created a barrier to entry for most people. There is a disconnect between blockchain, businesses and their legacy systems.

WORBLI are building the bridge between blockchain and mass adoption

WORBLI Vision

WORBLI's network infrastructure - including computing power, data storage, and bandwidth - can be accessed with the WORBLI Token.

Developers can launch new applications knowing anyone in the WORBLI community can use them. WORBLI will create the protocols that make all this possible, leaving developers free to focus on building their project.

ABOUT WORBLI

WORBLI leverages EOSIO software and is capable of hosting a variety of decentralized applications (dApps). The protocol focuses on widespread user adoption and providing a secure, reliable and compliant ecosystem for financial innovation.

Importance of Compliance

The critical trait of EOS is the ability to build on a chain governance layer. With EOS, WORBLI can set the rules of the blockchain at the base layer. All user accounts, transactions, and nodes must follow the rules of the governance layer that WORBLI decides upon.

The block producing nodes will follow strict compliance guidelines and will submit to regular auditing of ownership stakes. The user accounts will have a built-in AML/KYC process at the point of account creation.

Key features of WORBLI

- Speed of transactions
- Compliance
- Security
- Tamper-proof transactions
- Account recovery
- Startup friendly
- Superior infrastructure
- Optimized for the enterprise
- Finance-focused blockchain
- Decentralization
- Strong community support

Audience & Customer Base

- EOSIO community
- Developers
- Block producers
- Startups
- Software and blockchain development businesses
- Advisory and consultancy firms
- EOS developers
- Individuals and Businesses
- Existing financial services businesses
- Businesses

Supporting the Vision

DEPLOY

a flexible and adaptive blockchain infrastructure capable of hosting applications developed in any programming language

INTEGRATE

natively with existing financial infrastructures by leveraging blockchain technology to develop a financial institution, tools, and services

RECYCLE

profits within the economy, to fund investment in the WORBLI Network and the community, via the WORBLI Network Fund

LEVERAGE

existing Blockchain platforms, tools, and services to create partnerships and reduce the need to develop every necessary component from scratch

ACCOMMODATE

enterprise needs such as stable pricing models (RAM) and volatility reducing features

CREATE

a new economic model that rewards businesses and customers for their participation in the WORBLI economy

IMMERSE

ourselves with the diverse EOS community and ecosystem to create a mutually beneficial relationship

INSPIRE

a new wave of talented and exciting developers through education and funding opportunities

REDUCE

barriers to entry for blockchain adoption

Industries WORBLI is built for

WORBLI will be utilised by a number of specialist industries and software developers. When this tech combines, we will see the applications we use on a day-to-day become more integrated and user friendly than ever before. Industries we will work closely with include:

| | |
|-----------------------------|---------------------------|
| Personal Finance | Retail and Ecommerce |
| Wallets and Security | Marketplaces |
| Insurance Technology | Gig Economy Services |
| Crowdfunding | Identity Management |
| Enterprise Banking | Remittance |
| Equity Finance | HR Technology (Payroll) |
| Debt Collection | Regulatory Technology |
| Energy Solutions | Data & IT Management |
| Foreign Exchange | Business Finance |
| Decentralised Exchanges | P2P Financial Services |
| Accelerators and VC's | Budgeting |
| Wealth and Investments | E-Sports & Gaming |
| Enterprise Tools | Property Technology |
| Pensions and Superannuation | Content and Streaming |
| Lending Services | Social Media Integrations |
| Charitable Donations | Residential Solutions |
| Direct Marketing | + More |

WORBLI's MAIN ADVANTAGES

Applications already committed to launch on the WORBLI Network:

Gamma Bank

A fiat and digital currency bank providing checking accounts, debit cards, trading, + more. Designed to eliminate the barriers to entry for the average user, Gamma Bank will facilitate the safe storage, trade and exchange of digital assets and fiat currencies.

Surepeer

A peer-to-peer decentralized insurance market built to meet the growing needs of the blockchain community.

1 Billion Token ShareDrop

Summary of WORBLI's ShareDrop:

- Initial tokens (total supply): 2.5 billion
- Tokens in ShareDrop: 1 billion
- Released quickly (subject to simple milestones): 150 million
- Usage test lower boundary: 15% of total coins staked
- Usage test upper boundary: 30% of total coins staked
- Further bonuses: % additions to release coins can be added for ShareDrop holders introducing or
- financing dApps on the network

Snapshot: 7th September 2018, 11:59 PM UTC

Some examples showing why Airdrop's are effective

EOSDAC

900M TOKENS AIRDROPPED
CURRENT MARKET CAP \$143M

OMISEGO

ETHEREUM AIRDROP
CURRENT MARKET CAP \$847M

ONTOLOGY

NEO AIRDROP
CURRENT MARKET CAP \$428M

Potential exchanges WORBLI will list on:

Boaexchange
OpenLedger
DEX
KuBitX
Gate.io

Bibox
Zb.com
Cryptopia
Hobit
Bitshares

WORBLI's (WBI) Token Issuance

The initial circulation comprises 2.5 Billion WORBLI tokens (WBI) issued proportionately as follows:

SHAREDROP 1 billion

40%

WORBLI FOUNDATION 500 million

20%

COIN SALES 475 million

19%

EXEC, FOUNDERS, BOARD 200 million

8%

ADVISORS 87.5 million

3.5%

STRATEGIC PARTNERS 87.5 million

3.5%

INCENTIVES 50 million

2%

SEED CAPITAL GAMMA BANK 50 million

2%

BLOCK PRODUCER 50 million

2%

TOTAL 2.5 billion

Roadmap Highlights

Phase 1 2nd Quarter 2018

- Help launch EOS main net in preparation for starting WORBLI's Network
- Finalize strategic, marketing and operational plans

Phase 2 3rd Quarter 2018

- Launch WORBLI, the EOS Friendly (soft) Fork
- Conduct WORBLI Network ShareDrop
- Seek additional funding to support WORBLI's Network and the development of the Gamma Bank MVP
- Confirm Block Producers and Block Producer Back Ups

Phase 3 4th Quarter 2018

- Add AML/KYC verification to WORBLI user accounts
- Publish WORBLI Network governance processes and engage WORBLI community in ongoing governance efforts
- Pursue additional strategic partnerships with digital currency exchanges
- Facilitate numerous launches of dApps on WORBLI
- Build Gamma Bank MVP

Phase 4 2019 onwards

- Continue recruiting and hiring for WORBLI team
- Hire world class executive team to develop and launch Gamma Bank
- Secure global correspondent banking relationships
- Launch Gamma Bank in global markets (Africa, Latin America, Australia and Europe)
- Develop correspondent banking relationships in the US
- Alternative Product Development on WORBLI. Insurance, DEX's and more are in the pipeline to be developed.
